Adress: Street “Siri Kodra”, Tirane, Albania (Home)

ABOUT ME

During my studies in Finance, I built a strong theoretical foundation. However, my 9-month professional training in software development enabled me to acquire advanced programming skills. I have gained in-depth knowledge of backend development using Java, allowing me to create and optimize stable and efficient systems. Additionally, I have basic knowledge in frontend development, through the use of HTML and CSS, which helps me understand the full process of application development. Alongside my technical skills, I have also developed strong communication and collaboration abilities, enabling me to work effectively in teams and contribute professionally to new challenges in a work environment.

DIGITAL SKILLS (Software Developer)

HTML5 | CSS3 | JavaScript | Bootstrap | jQuery | Git | GitHub | Node.js | API | SQL | Angular | Adobe Photoshop | Web Design | JAVA | Spring | JAVA Fundamentals | JAVA-Advanced | Software Testing | Databases-SQL | JDBC & Hibernate | Design Patterns |

●WORK and EXPERIENCE

SDA Academy Bootcamp: Java (480 Hours)

I successfully completed the Java Full-Stack Developer Bootcamp at SDA Albania, where I deepened my knowledge in Java and related technologies like Spring and Hibernate. The program included advanced skill development in building secure and robust backend applications, utilizing Spring for dependency management, quality control, and database integration. This hands-on training prepared me for full Java projects and complete backend development applications.

Housing specialist, Durres Municipality

Durrës, Albania on-site

In the municipality of Durres, I have been working as a Housing Specialist for 5 years. My role consisted in the implementation of social policies

4. Weekly sales and marketing reporting to management structures

Parking Management System -JAVA

Project: Parking Management System <https://github.com/eneakula/Parking-Management-System>

Developed a comprehensive parking management system using Java SE, demonstrating advanced programming and system design skills.

Key aspects include:

- Implemented a full-fledged Java application using Object-Oriented Programming (OOP) principles
- Utilized JDBC for MySQL database connectivity and management
- Designed a layered architecture separating business logic, data access, and user interface
- Developed CRUD operations for core system entities
- Created a dynamic pricing system based on parking duration
- Implemented exception handling for robust error management
- Utilized Java collections for in-memory data management
- Developed a console-based user interface

Technologies and concepts:

- Java SE
- JDBC (Java Database Connectivity)
- MySQL
- OOP (Object-Oriented Programming)
- DAO (Data Access Object) pattern
- Database transaction management
- Java time API for date and time handling

- Console I/O operations
